The instructions provided in this informed consent should be followed by all patients receiving a Venus Legacy™ treatment. You will be asked to sign this form to acknowledge that you have read and understood all of the information presented.

Indication

The **Venus Legacy™** system is indicated for temporary reduction in the appearance of cellulite, improvement in local blood circulation, and for the relief of minor muscle aches and pain, relief of muscle spasm. Treatment duration with Venus Legacy™ will last approximately 20-30 minutes, depending on the number of treated areas as well as the size of the area treated.

REALISTIC TREATMENT EXPECTATIONS

- There will be improvement in cellulite appearance, but not complete elimination. There will be improvement in thigh's circumference. However, the response is individual
- The degree of response to the Venus Legacy treatment, and the number of treatment sessions required will vary among patients and will depend on the clinical and physiological condition at the start of the treatment regimen. Some patients respond more than others
- The treatment results are temporary and one maintenance treatment session every 3-6 months is recommended to sustain them
- A healthy lifestyle (diet and exercise) may help to obtain better results, but is not essential. However, weight gain may have a negative effect on the results
- Non-ablative gradual improvement of skin texture/laxity without down time or high risk factors, more commonly associated with laser skin resurfacing
- Superficial acne scarring and enlarged pores may show some improvement by building new collagen in the dermal area

A Venus Legacy™ treatment **SHOULD NOT** be performed on patients with the following:

- Any skin disease in the treatment area
